SYNTHETIC DIAMONDS PREPARED FROM ROSES

ABSTRACT

The present invention relates to a method of making a more permanent remembrance from a gift that includes organic material, wherein the gift has ephemeral beauty and symbolizes the feelings of a gift-giver toward a recipient. This method includes transforming the ephemeral beauty of the gift to a more permanent or eternal manifestation that symbolizes the feelings of the gift-giver toward the recipient. This result is conveniently achieved by converting the organic material of the gift to a synthetic diamond. The synthetic diamond can be prepared by transforming the organic material of the gift to a carbon or carbon-containing compound; and then converting the carbon or carbon-containing compound into the synthetic diamonds.
